Scriba-NanoPrinter

Laser Printing of miniaturized two-dimensional code label

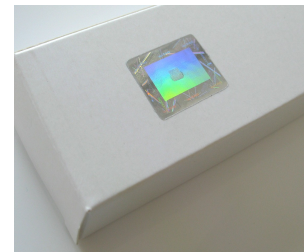

Printing line of nanostructured holographic labels. This laser printer is able to generate serial **codes** and information content:

- ✓ **Unique**, with automatic serials generation
- ✓ **Encrypted**

Technical data:

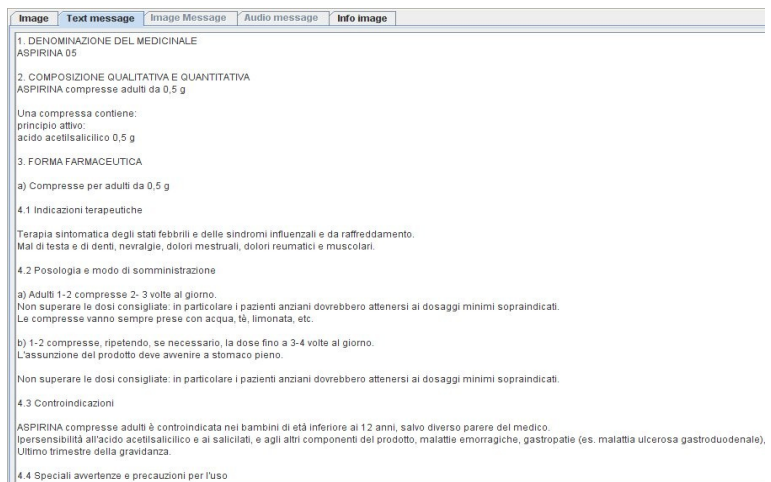

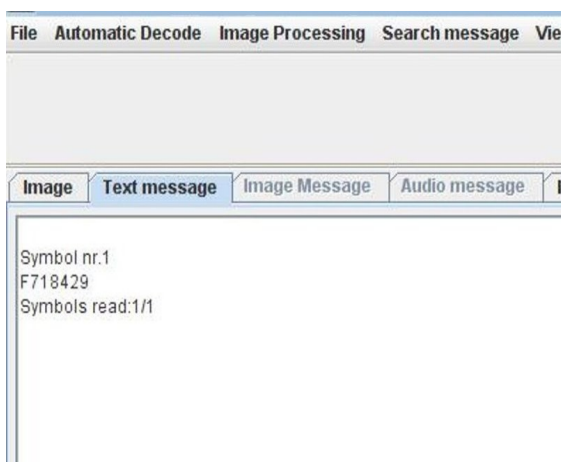

Print speed: 2000 labels hour
Content: 6 bytes to 1014 byte compressed
Information density: 2500 bit/mm²

Examples:

Serial Numbers

Custom Data

Scriba Nanotecnologie S.r.l. Via P. Gobetti 52/3, 40129 Bologna (Italy)
